

OVS-15000

Output Verification Switch

The OVS-15000 was designed to provide an economical form of fluid discharge verification for extremely small volume pump systems. The device is typically installed directly in the discharge line just downstream of the pump discharge check valve. The ability to operate at pressures up to 6000 psi makes this switch an ideal candidate for pump output fluid verification in a wide range of applications.

Specifications

Connections: 1/4" Tubing

Size: 1.5" x 2.2" x 1"

MAOP: 6,000 Psig

Elastomers: Viton

Materials: 316 SS

Design Advantage

Adjustable Switch Positioning

Field Serviceable

Compact Size

Customizable Flow Range
